List of Contents

NUMBER 1

Michiaki Kobayashi	1	Theoretical study of acoustoelastic effects caused by plastic anisotropy growth
Oscar W. Dillon, Jr. **John W. Osborne**	21	Residual stresses in cyclically loaded two-phase solid
Kavesary S. Raghavan **R. H. Wagoner**	33	Analysis of nonisothermal tensile tests using measured temperature distributions
Koji Fukatsu **Masanobu Oda**	51	Dynamic elasto-plastic buckling of initially curved bars
K. T. Kim **M. M. Carroll**	63	Compaction equations for strain hardening porous materials
R. C. Batra	75	The initiation and growth of, and the interaction among, adiabatic shear bands in simple and dipolar materials

NUMBER 2

James F. Bell	91	The generation of transverse radial shear waves at a boundary between the domains of plasticity and elasticity
Hiroshi Takahashi	115	An examination of the Lin model for polycrystal plasticity by means of two-dimensional finite element analysis
C. Lee **W. H. Peters** **M. A. Sutton** **Y. J. Chao**	129	A study of plastic zone formation by digital image processing
Ch. Beradai **M. Berveiller** **P. Lipinski**	143	Plasticity of metallic polycrystals under complex loading paths
S. Im **S. N. Atluri**	163	A study of two finite strain plasticity models: an internal time theory using Mandel's director concept, and a general isotropic/kinematic-hardening theory

NUMBER 3

H. Ramsey	193	Localized axisymmetric plastic buckling deformation in cylindrical Cosserat shells under axial compression
Elias C. Aifantis	211	The physics of plastic deformation
Paul Michelis	249	True triaxial cyclic behavior of concrete and rock in compression
Jacek Ronda	271	A material behaviour model for a lead alloy
David W. Nicholson	295	Research note on application of a constitutive inequality in nonassociated plasticity

NUMBER 4

Jürgen E. Paulun **Ryszard B. Pęcherski**	303	On the application of the plastic spin concept for the description of anisotropic hardening in finite deformation plasticity
G.J. Weng	315	Anisotropic hardening in single crystals and the plasticity of polycrystals
D.R. Metzger **R.N. Dubey**	341	Corotational rates in constitutive modeling of elastic-plastic deformation
U. Zdebel **Th. Lehmann**	369	Some theoretical considerations and experimental investigations on a constitutive law in thermoplasticity
S. Yoshimura **K.L. Chen** **S.N. Atluri**	391	A study of two alternate tangent modulus formulations and attendant implicit algorithms for creep as well as high-strain-rate plasticity
C.R. Chiang	415	Research note on plastic behavior of polycrystals under shear
